Creative Coding

<center>Cultural Event 3: Projection Mapping Club Event</center>

The third cultural event that I went to this quarter involving digital media and creativity with coding was the Projection Mapping club event. This took place just outside of Shwayder around 9pm. This was an interesting event, I didn't get to see that much of it, but their setup was pretty cool. They had a projector and some cameras that they would take around to various places and use projection mapping through various projects. It was really interesting seeing how the projections worked. Brock was actually showing his project off there as well and it was fun getting to see the laser pointer being mapped from the trees.
